

All-in-One Data Platform

The easiest way to sync, store, and leverage your business data

1. Sync

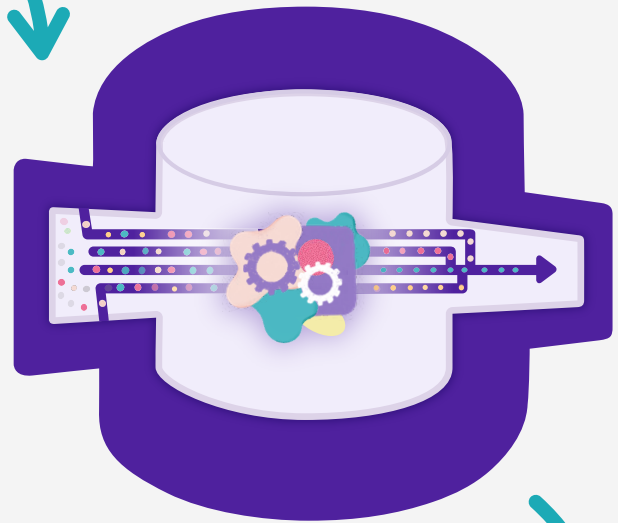

Disorganized, siloed data that's difficult to analyze? Easily sync it with two types of connectors.

Panoply Snap Connectors connect popular data sources to Panoply in a few clicks. Our Flex Connector connects to nearly any other API source.

2. Store

Your Panoply data warehouse is a centralized hub for all your business data. With automated collections and a single source of truth, you're ready to leverage your data for insights.

Now that your data is consolidated, explore it in the Panoply workbench or with our no-code Query Builder.

3. Leverage

With in-platform dashboards, instantly see your data for a clear picture of your business and actionable analytics.
